

ANURAG GOYAL

Full-Stack Developer • BCA Student • Spring Boot | React

Agra, Uttar Pradesh | +91 63988 02517 | goyalanurag2005@gmail.com | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Full-Stack Developer and BCA student with hands-on experience working on real-world applications using React, Spring Boot, and modern backend systems. Skilled in improving existing systems by implementing secure authentication, optimizing database architecture, and enhancing UI/UX. Strong interest in scalable systems, clean code, and solving practical engineering problems in collaborative environments.

TECHNICAL SKILLS

Languages: Java (DSA), JavaScript, SQL

Frontend: React.js, Tailwind CSS, Framer Motion, HTML5, CSS3

Backend: Spring Boot, FastAPI (Python), REST APIs

Cloud & Databases: Supabase, MySQL

Security: Role-Based Access Control (RBAC), JWT Authentication, Spring Security

Tools & Platforms: Git, GitHub, VS Code, Vercel, Postman

PROJECTS

Full-Stack E-Commerce Platform | [React.js](#) · [Spring Boot](#) · [Supabase](#) · [PostgreSQL](#) · [RBAC](#)

- **Supabase Cloud**, Migrated the data layer from local PostgreSQL to
- **Role-Based Access Control (RBAC) system** Engineered a granular
- with distinct permission sets for Admin and Customer roles, securing all sensitive API endpoints.
- **Supabase Auth** Integrated
- **Bento grid layouts** Designed a responsive, modern UI with
- and smooth transitions using Tailwind CSS, improving visual engagement.

Semantic Book Recommendation System | [React.js](#) · [FastAPI](#) · [ChromaDB](#) · [Hugging Face](#)

- **7,000+ book dataset** Built a context-aware book finder over a
- using vector embeddings and semantic search to surface relevant recommendations beyond keyword matching.
- **Hybrid Search pipeline** Implemented a
- combining vector similarity (ChromaDB) with relational filters, improving recommendation accuracy.
- **FastAPI** Developed a high-performance backend with
- to handle asynchronous AI model inference efficiently.

Course Management System (In Progress) | [React.js](#) · [Spring Boot](#) · [MySQL](#)

- **Frontend Refactor** Re-architecting an existing course platform with improved component structure and modern user experience patterns.
- **JWT Authentication** Implementing JWT-based authentication with Spring Security to protect API routes and enforce access control.
- **Admin Dashboard** Building a dedicated admin panel for full course and user management, enabling CRUD operations across all resources.
- **Clean Architecture** Focusing on layered backend design with clear separation of concerns to ensure long-term scalability and maintainability.

EDUCATION

Bachelor of Computer Applications (BCA)

Dr. MPS College, Agra • CGPA: 7.1 / 10

2023 – 2026 (Ongoing)
